REFER the Farmers to the statements below, made by Dr. John Steller and L. F. Brailler. I have seen it in operation several times. I am satisfied of its great utility. As he season is advancing, I now offer those I have on hand for L. P. CREATRAM.

NASSTRILE, June 28, 1858. Con. L. P. Cheatham: - Iwar Sir :- I have been using he "Reaping and Mowing Machine" paten ented by Manney of Illinois, which you are now offering to the critices of Tennessee. It is a First Rayre Labor naving Machine. It works NEATLY and MATSULY. The amount cut per day will depend principally upon the speed of the team. If the team can rarel four rules per hour, it will Kenp or Mow, fifteen acres

n ten hours. It is catified to the confidence of the public.
Respectfully J. SHELBY.

1, L. P. Bradley, now managing the farm of Dr. Shelby,
make the following statement: We have had for more than
one week one of Col. Cheatham's moving and teaping machines we havetried it in clover and grain blown and tan gled, and I now state that it mows and cuts cleaner than the sythe blade, and that it will mow per day as much as 14 hours, and it can reap at least twenty-four acres per day.

J. H. Burrow's Patent Piantation

This Milidiffers from all others in the construction of the upper or limining Stone, which is composed of French Burr Blocks, enclosed in a cast iron Case, which forms the back and hoop of the Stone with a Cast from Eye, or Bush, than is of greater external diameter at the bottom that at the top, which is secured to the back by four boits, so that every block is in the form of a dove tail which gives greater strength to a Stone than any other method which is required in small mills, where the stone is run with great speed, and becomes dangerous if not strongly made. It also gives any weight to a stone of small diameter that is required without having it thick or high, that makes it top heavy.

This mill is a square frame made of wood or cast from, in the form of a bust, with Bridge-tree, Spindle Bahance, illug Briver, and Regulating Serew, and grinds ut on the same principle as a large mill, differing only in the Runner Stone; this belong of great weight cuables it to grind nearer the center a greater quantity of grain with the spower than any other with severe to the stone of the same of the same and the same of the s

MR. WINTERS had lost nearly all of his hair and and now has as becatiful a head of hair as any man stored, and now has as becautiful a head of hair as any map eouth wish. His age is about to years.

A son of Mr. Warren, of this town, 14 years of age, had been afflicted with the Asthma from his eradic. He had the benefit of the best medical advice that a loving and wealthy father could procure, without axail. It was one of the most aggravated cases I ever saw, he was emacinted al-most to a skeleton. By the use of a few bottles of the Out-menths was fewer for the cases and the second and the continuous teach. ment he was thir employeured, and for seven months past has enjoyed robust health.

ment. This was four months ago and the lady (a Mrs. Dun-ham,) is still in good beath, and able to attend to her usual household duties. There treated two cases of Chronic Sure Eyes with the Outment, both of the patients so simply blind, as to need an attendant to lead them from place to place. One of them had been afflicted is years, the other about 5 years. They had tried the best physicians in the State, without benefit; and one of them had been under the treatment of the celebrated Dr. Muzzy, of Cincinnati, for eighteen menths, and had expended buildreds of dollars in vain efforts to effect a cure. They are now by use of the Magnetic Outment, nearly or quite cored; and are able to read and attend to any ordinary business. I have used the Outment in a number of cases of Piles, and in no case has it failed of giving amusilate relief and generally a permanent core. I have also used it beneficially in severe cases of Ery-sipolas. this being of great weight cuables it to grind nearer that center a greater quantity of grain with less power than any other mill now in use. This mill isportable, and may be attached to steam, water, horse or hand power.

ALSO, all sizes of Erench Burr Mill Stones, manufactured on the same principle.

Joseph H. Burrowa, of Cinetanati, is the inventor, for which be obtained Letters Patent in 1842. For allinforgements the purchaser will be held responsible for the right of using.

These Mills do not require a Millright to set them up; and all that is necessary to put them in operation, is to attach a hand to the pulley on the spindle, with a dram sufficiently large to run a twenty-four inch Mill 240 revolutions per minute, attached to Gin, Steam, or Water Power. By the steady application of two horse power the Mill will grind s.x to 8 bashels per hour of good meal; and will grind when as well as corn. The thirty lach mill, if put to its fullest speed, will grind from tew to fifteen bushels per hour.

These mills are warranged to be in every respect as rocommended.
